

IMPORTANT INSTRUCTIONS FOR LIVE STREAM SOUND OPERATOR

Be prepared to adjust the LIVESTREAM slide when the organ is playing - it can get rather loud. Do adjusting gradually.

Keep an eye on the choir to let you know if the Choir Monitor is too loud or not loud enough. Use the Choir Monitor slider to turn volume up/down. If Terry has a sound person's phone number she will text them for changes.

- Please no use of phones during service
- Wear headphones at all times beginning at 10:30 a.m.
- If you do not hear any sound coming from headphones, please alert the LiveStream crew ***immediately***.
- Before service begins you should just be able to hear 'mumblings' not distinct conversations. Adjust the ambient mic as needed?
- If you hear pastor singing let the Soundboard operator know so they can mute him.
